

Text Structure 5

Directions: Read the passages and on a sheet of paper, **put the information from each passage into an appropriate graphic organizer.** The following graphic organizers are examples. Feel free to make changes if necessary.

Chronological	Sequence	Cause and Effect	Problem and Solution	Compare and Contrast
<p style="text-align: center;">Time Line</p> 	<p style="text-align: center;">Step by Step</p> 			

1. Tornadoes and Hurricanes

Hurricanes and tornadoes are both amazing yet deadly natural phenomena. Both generate deadly conditions, but in different ways. Tornadoes are likely to damage people and property with their high winds, which go up to 300 miles per hour, but hurricanes are generally more feared for their flooding. Also, hurricanes can produce tornadoes, which makes them quite dangerous indeed.

2. Where Did This Tornado Come From?

No one knows exactly what causes tornadoes, but some scientists believe that when warm air meets cold air, a tornado may form. The reason for this is that the warm air is lighter than the cold air, so it rises up fast and meets different winds moving different directions. Under the right conditions, this can cause a tornado. Though there is still much mystery surrounding tornadoes, many people believe that when warm moist air meets cool dry air, tornadoes can result.

3. Twista

Carl Terrell Mitchell, better known by his stage name Twista, was born in 1972. Nineteen years later Mitchell's first album, "Runnin' Off at da Mouth," debuted. In 1997, after appearing on a hit song, Twista was signed to Atlantic Records. Under that label he released "Adrenaline Rush" and formed the group Speedknot Mobstaz in 1998. His 2004 album Kamikaze went to number-one on the U.S. Billboard 200 album chart.

4. The Twist

The twist is a dance inspired by rock and roll music. To do the Twist, first stand with your feet approximately shoulder width apart. The torso may be squared to the knees and hips, or turned at an angle so one foot is farther forward than the other. Then, hold your arms out from your body, bent at your elbow. Next, rotate your hips, torso, and legs as a single unit with your arms staying more or less stationary. Every so often lift one leg off of the floor for styling. Now you're doing the twist!

5. Dancing

There are many reasons why people dance. Some people dance for fun, just because they enjoy dancing. At other times, people dance for exercise or for weight loss, because dancing can really get your heart beating. Also, sometimes people dance to try to get boyfriends or girlfriends. Some people think that good dancing is attractive. There are many reasons why people dance.
